AMENDMENT TO THE ABSTRACT

The following abstract will replace all prior versions of the abstract in the application:

ABSTRACT

A skeleton structure member made up of a skeleton member (11) having a cross-sectionally closed space (16, 33, 43, 63, 73, 83, 93) and multiple granules (17) packed inside the skeleton member. A granule flow allowing part (14, 42, 61, 71, 81, 92) for allowing movement of the multiple granules is provided inside the skeleton member and suppresses excessive rising of its-internal pressure within the skeleton member. This-The granule flow allowing part is provided in the vicinity of the multiple granules.
